

## TEAM BOCCE

- Divide the group into two teams, one with blue bocce balls, one with yellow.
- Have players on each team count off by twos so they are either assigned # 1 or # 2.
- To start the game a player throws the target ball away from the group. First the #1 Yellows toss their bocce balls toward the target. It helps if they do this one at a time, but quickly. Next the #1 blues toss, followed by the #2 yellows and finally the #2 blues.
- After the balls have been tossed everyone walks toward the target ball to observe which teams balls have landed closest to the target ball. No one is allowed to move the balls with their feet or hands while observing.
- Only one color can score. If there are 3 yellow balls closest to the target ball and the next closest is blue, the yellow team would score 3 points. If there is 1 blue ball closest to the target ball and the next closest is yellow, the blue team would score 1. The game can be scored to 21 points or what ever works for your time allotment.
- Emphasize the importance of tossing the balls close to the target ball no matter what.
